Find out your shoe size!

These line should measure 5 INCHES

1. Print this sheet at 100%
Select Actual Size.
Do not fit or scale.

2. Check your page's scale
MEASURE THE LINES

3. Cut along the dotted line at the bottom of the page.
4. Place the cut edge of the paper on a flat surface against a wall.
5. Line your child's heels to the edge of the page, against the wall.
6. Draw a line in front of your child's longest toe.
7. If your child's toe is close to the next size or if it measures to an exact size, go up a size. This chart correlates to the space inside the shoe, and each size line represent the tip of the shoe. So, if your child's toe is at the Size 25 line, it means that the toe would be hitting the front of a size 25 shoe.
